Our Journey so farrrr

Theme of the week

Collaboration and mentoring for social change

Preventing this:

How it started:

How it is going??

Sustaining this:

Part 2: **Toxic** situations and more

Thinking about all the previous examples...
What are your ethics dealing with confrontation among peers?

Response: Fight or Flight

In-Class Exercise: Peer Mentorship

In-class exercise!

Find someone you never talked to in the class

Start with a problem

Tell your partner about a problem you're struggling with in your project and you need outside perspective on.

Talk it out

Repeat the problem in your own words. Then, instead of offering advice, try to **ask follow-up questions**.

Uno Reverse!

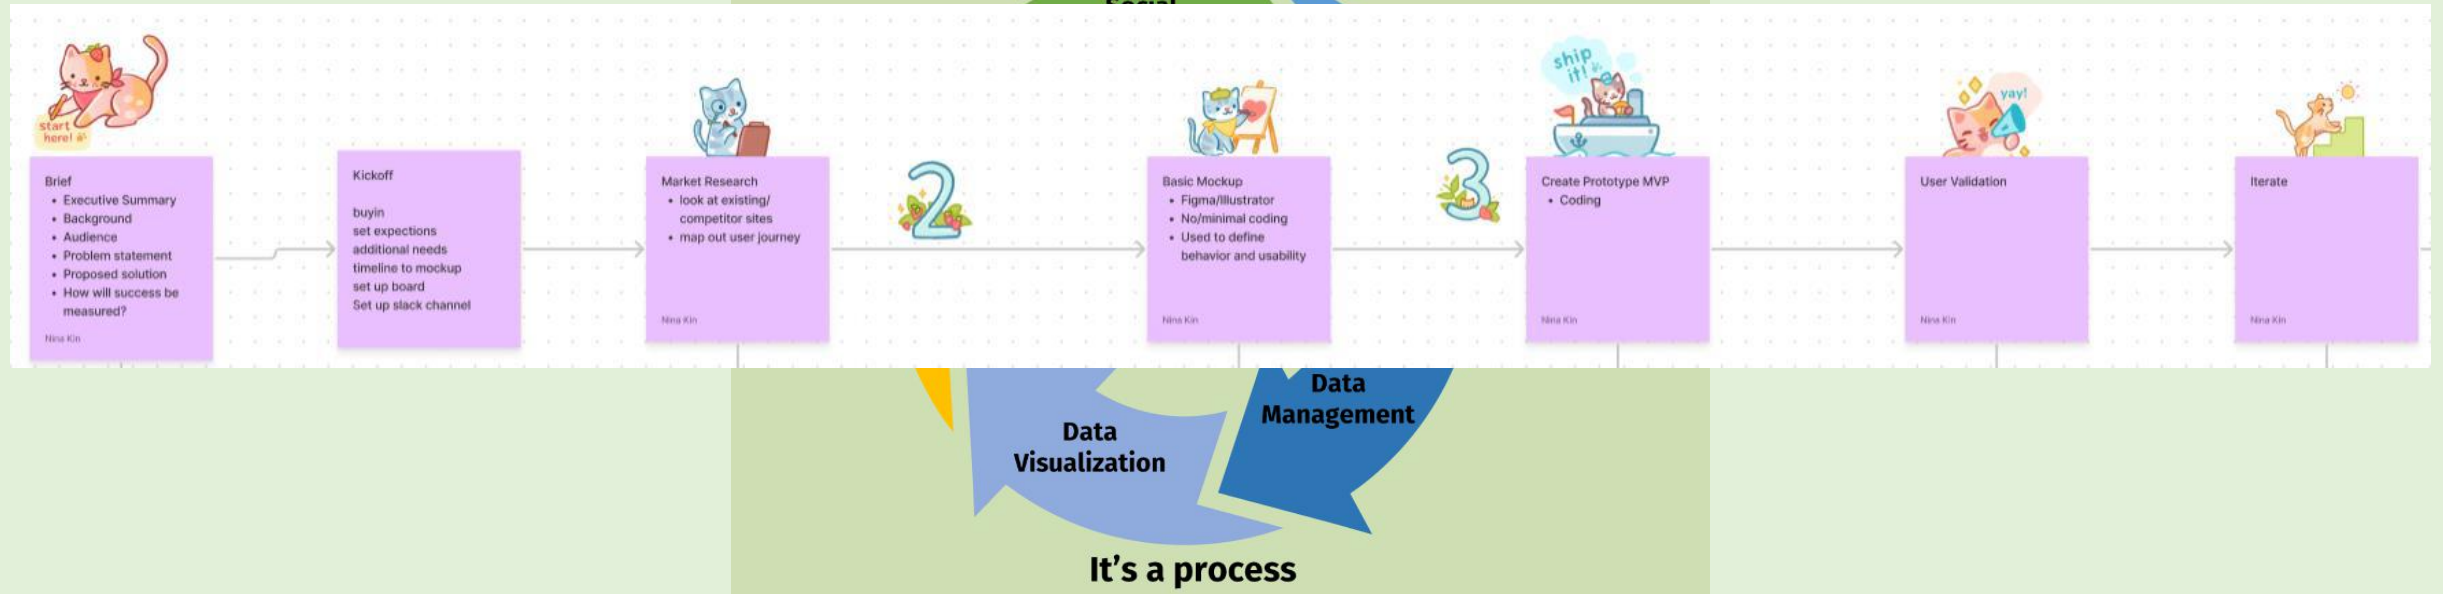

Switch places and try the same process again!

Follow-up questions

- Reflect on what the process of communicating that has already added to your experience;
- As a mentee what was your mentor able to add?
- As a mentor, what new things have you learned from this short exchange from the mentee that is related to your project?

Working towards social change is an iterative process.

What is this course?

Just like how your group projects are a part of that iterative workflow...

So too is:

community organizing

collaborating

mentoring

Are all a part of a continual process of change.

Sustainable Organizing

Lucy Shen, AA191-A Visiting Voice, 2021

Why a post-final social event?

Sustainable Organizing

Community care!

Let's keep all this in mind when going forward in any project!

In-class Thinking Cap

Respond to ANY of the following in 2-3 sentences

Did the simple act of stating your problem out loud bring any insights?

Did your partner bring anything up that you had not considered?

Was it difficult to avoid giving advice?

How do you seek to be peers and/or mentors for civil society?
