

PIC 40A: Homework 1 (due 4/12 at 5pm)

This first homework is very easy but it illustrates a few things which will be important in almost *every* future assignment.

- You must upload your files to **Gradescope** before the deadline.
- You must upload your files to the **PIC server** in the appropriate directory before the deadline.
- Both submissions must be **identical** (down to the character).
Never make changes to the PIC server submission after the deadline.
(We can see when a file was last modified.)
- You must tell us (me and the grader) your **PIC username**.
- You must **validate** your HTML using <https://validator.w3.org/>.

In this assignment you will make two files...

1. `README.txt`. This will only contain your PIC username.
(This is so we can look at your live webpage.)
2. `index.html`.

This will contain the HTML for a simple webpage and is the majority of the assignment.

As mentioned above, you should submit both files to Gradescope before the deadline.
You should also submit `index.html` to the PIC server. Save it in the directory

`/net/laguna/???...??/your_username/public_html/HW1`

(in the folder `HW1` within `public_html`). We should all be able to view your live webpage at

www.pic.ucla.edu/~your_username/HW1

Now, I am just left to tell you what I want `index.html` to achieve. Go over the page for that!

Make a short webpage about one of the following...

- your favorite band or musician
- your favorite sports person
- your favorite movie or movie star
- your favorite comedian
- your favorite author
- your favorite food or food ingredient
- your favorite celebrity

In my case, I'd be making a webpage about either Meshuggah, Rafael Nadal, V for Vendetta, Keanu Reeves, Rik Mayall, George Sanders, Ras el hanout, or Tommy "India-nesia" Fury.

The first line of `index.html` should be `<!DOCTYPE html>`.

Make **appropriate** use of **all** of the following HTML tags:

- `<html>`, `<head>`, `<meta>`, `<title>`,
- `<body>`, `<header>`, `<main>`, `<footer>`,
- `<h1>`, `<h2>`, `<section>`, `<p>`,
- ``, ``, and `` (with the value of the `src` attribute set to a web address).

Have the footer area provide some (made up) copyright information. You **must** use `©`. You could also try out ``, `<i>`, `
`, and `<hr>` (optional).

Grading

Here's how your work will be graded...

- 5pts, all or nothing - you told us your PIC username and uploaded your files to the PIC server before the deadline.
- 5pts, all or nothing - your files are identical to what you submitted on Gradescope.
- 5pts, all or nothing - your HTML validates.
- 10pts, up to a 2-point deduction for each missing tag and each inappropriate use of one - your `index.html` accomplishes what is asked for.

Note: In future assignments, failure to address the first 3 bullet points will also result in **significant point deductions**, so please always address these issues.
