JOB DESCRIPTION

We are looking for somebody to design a new website for our company using either Wordpress, Squarespace, or Wix. We will need to migrate some content from our existing site to the new site and most importantly build out some new pages to better meet the demands of the current brewery marketplace. Currently, we utilize Wordpress, but many years have passed since the structure and resulting content have been refreshed. We will discuss more specifics upon kickoff. Should be an exciting project that we are looking forward to working with you on!!!

COMPANY DESCRIPTION

Wabasha Brewing Co is a family owned brewery focused on the triple bottom line and using our business as a force for social and environmental good. A welcoming gathering space for all, adding value to our community, and providing good jobs to Minnesotans are all central components of our business.
