📝 Lab Assignment #5 - CSS Grid Layouts

Due 5/18

Using your lab assignment from `week 5`, touch up your mapplication by creating a layout with CSS Grid and making a cohesive webpage.

The requirements are:

- A title for the webpage describing what is being shown

- Design a responsive-layout using CSS Grid

- Use a sub-grid (grid-within-a-grid)

- Utilize `buttons` or `divs` to interact with your map (Revisit Lab #3 for more info)

Submission

Post your link as a comment in the Discussion forum for Lab Assignment #5

Extra Credit

Any of the following can be done for extra credit:

- Create a completely different responsive layout using CSS grid

- Add multiple CSS grids

- Move the survey into a button, rather than an iframe!

- Utilize circleMarkers instead of regular markers

- Use CSS to style the marker pop-up window!

- Try a sticky header
