Zoom Headquarters
55 Almaden Blvd, Suite 600,
San Jose, CA 95113

Dear Mrs. Gray,

I am a Computer Science student at UCLA, graduating in Spring of 2023, and I'm interested in the Frontend Intern position at Zoom. I learned about your program through LinkedIn, and I believe my skill set and aspirations match well with what you are looking for.

In my position at The Amplification Project, I worked to develop a platform meant to preserve digital art in the name of spreading social awareness for forced migration. Here, I had the opportunity to design and develop using HTML/CSS/JavaScript, while working towards a cause for social betterment. As the sole frontend developer in the organization, I was forced to be responsible for my own workload and communicate design decisions and intricacies back to my supervisor effectively. My time here taught me valuable team skills and gave me the opportunity to grow as a developer in ways I never could have in a larger organization.

Recently, with a team of friends, I've taken part in developing a food review application called BruinByte. This application was written using React.js/Node.js/Firebase, and provided a good opportunity for me to manage and organize a project of my own creation. This project allowed me to gain experience operating within an Agile environment, and taught me a great deal about what it meant to be self-driven and detail-oriented.

More details of my work experience and projects can be found in the resume I've attached. If you believe I would be a good fit for your program, please feel free to contact me through any of the platforms I've provided, and I would appreciate an opportunity to interview for a position. Thank you so much for your consideration.

Sincerely,

Charles Zhang

Requirements:

- Currently pursuing an undergrad or graduate degree in Computer Science, HCI, Electrical Engineering or a related STEM field.

- A minimum of one year of coding experience with one of the following languages and frameworks: JavaScript, HTML, CSS, Angular, React.js, jQuery

- Sponsorship for employment visa status is not available for this position. You must be legally authorized to work in the United States.

- Available to complete the full 12-week internship program during Summer 2022, with a time commitment of approximately 40 hours per week.

- Detail oriented, organized, ethical, responsible, and self-motivated.

- Team player, ability to work effectively in a diverse organization.

- Strong communication skills and a desire for continuous learning.

- An authentic interest in advancing Zoom's mission, values, and culture.
